

How we do it

By using a unique combination of skills and methods we are able to deliver successful projects that bring together sound technical expertise and effective management and support.

How we support our clients

The provision of quality support services is central to our philosophy of long term partnership with our clients.

- Each client has a dedicated account manager
- Well defined project lifecycle methodology comparable to PRINCE2
- Variety of support packages from pay-as-you-go to fully managed

More on support

Build on solid Foundations TM

Foundations TM is a complete toolset for the development of high performance browser based business software.

- Overcome the limitations of off-the shelf software
- Interchangeable components working together in a standards based framework
- Developed to meet customer's specific business requirements
- A breakthrough in the delivery of reliable and effective software projects
