

Joanne Pontee

Public Sector

PDMS has an excellent record of delivering successful solutions to the public sector ranging from content management solutions to complex business systems. We work with local government, central government and the criminal justice sector.

We have been selected as an accredited supplier for Application Development Services on the Specialist Solutions, Catalist Framework Agreement managed by the Government's OGCbuying.solutions. PDMS are one of only 15 companies selected to provide end to end application development services to a wide range of public sector organizations.

We have a good understanding of the specific requirements of government and our Foundations TM technology platform and components have been designed to meet open standards and the e-gif requirements. Our software solutions provide the flexibility and scalability to cope with the changing requirements of government whilst importantly, offering value for money.

We provide high levels of support to all of our public sector clients and are ISO 9001:2000 and 27000 (formerly BS7799) accredited, ensuring that our processes meet internationally recognised quality standards.
