

Services

We provide a range of IT services and specialise in browser based business systems for a wide range of markets.

Using our Foundations TM technology platform and extensive component library we build:

- Enterprise Business Systems
- Internet, Intranet & Extranet Solutions
- Multi-channel solutions (Interactive Voice Response, SMS)
- Mobile solutions (2G, 2.5G and 3G)
- Communications Systems (e.g. call centre automation, telephony)
- Electronic Catalogues
- Databases

Together with our partners Domicilium, a European tier-1 ISP, we provide fully managed application hosting services from our state of the art hosting centres on the Isle of Man and in London. Our application management services have been specifically designed to optimize the performance and security of business critical applications which run over the Internet
